PROFESSIONAL EXPERIENCE

INTUIT

Software Engineer 2 | June '25 - Present

- **Founding engineer of the Embedded Lending team, building a new product line to offer QuickBooks Capital loans outside the QuickBooks ecosystem through strategic partnerships, starting with Amazon:**
 - Architect and developed the embedded lending web application using React, **TypeScript, Java (Spring), and AWS**, enabling non-QuickBooks users to access lending services for the first time.
 - Led the integration of the loan onboarding experience into the embedded platform, navigating **cross-team API contracts** to deliver a seamless application flow.
 - Shipped Phase 1 to production with Amazon, serving ~2000 QBO users, with Phase 2 targeting **~8,000 non-QBO users** to drive new customer acquisition.
 - Built a **Chrome extension** from scratch that auto-fills loan applications, reducing manual testing time from **5–10 minutes to ~5 seconds** — adopted daily by **25–30 engineers** across the org.
 - Established the team's **first alerting and incident runbook**, monitoring uptime and errors — proactively catching incidents before user impact.
 - Leveraged **AI-assisted development tools** (Claude Code, Cursor) to accelerate delivery across the full stack.
 - Serve as **Scrum Master**, driving sprint ceremonies and delivery cadence for a newly formed team.

PROFESSIONAL EXPERIENCE

LVIS

Senior Frontend Engineer | Mar '22 - Sep '24

- **Spearheaded the migration from Vue 2 to Vue. 3:**
 - Adopted the Composition API to simplify complex components.
 - **Refactored 200+ components** to leverage Vue.js 3 features.
 - Optimized state management using Tanstack Query.
 - Reduced load times by 20% and **improved scalability**.
- **Collaborated on architecting a WebSocket-driven notification system:**
 - **Designed real-time WebSocket** communication protocols from scratch.
 - Introduced alerts with near-instant delivery, significantly **improving user responsiveness**.
- **Engineered a PHP-based backend service for onboarding and billing automation:**
 - Automated dynamic billing with Stripe API, improving accuracy.
 - Eliminated manual adjustments, **saving time and reducing errors**.

SKILLS

- Front-end** React Jest Next.js Vue.js Redux RTK Selenium Axios SwiftUI Storybook anstack Query Accessibility (Ailly) Internationalization (i18n) Security SSR SSG SPA MPA BFF PWA WebSockets SSE Feature flags CSS3 (SASS) HTML Tanstack TailwindCSS MUI Prisma

- Databases** MySQL, PostgreSQL, MongoDB,
- Programming languages** JavaScript TypeScript Python HTML CSS
- Tools** CI/CD Git GitHub Bitbucket Agile Methodology Figma Linux
- AI** Open AI API RAG LLM fine-tuning Agentic AI Llama3.2 Claude Code Cursor

PROJECTS

MAFISO
IOS ENGINEER

Frontend: Swift, SwiftUI
Backend: NodeJS, Google Firebase

DEADBUILLOCK.COM
FULL STACK ENGINEER

Frontend: TypeScript, React, Redux
Backend: Python, Postgres, Supabase, AWS
AI: Amazon Bedrock, Llama3.2

SAN FRANCISCO STATE UNIVERSITY
Computer Science B.S. (GPA: 3.7)
Aug 2019 - May 2021
